

BioProducts

[SOBIN Southwestern Ontario Bioproducts Innovation Network](#)

ECO Canada was established in 1992 as part of Canada's sector council initiative. With a solid reputation in the field of human resource management, ECO Canada's services reach all participants of the environmental sector including employers, practitioners, educators, and students.

[Ontario BioAuto Council](#)

The Ontario BioAuto Council has a mission to position the province first in the race to meet the growing demand for affordable, sustainable bio-based products. The council brings together Ontario's distinct advantages in the growing bio-based economy, and helps ensure participants have every opportunity to succeed.

[Topia](#)

Topia is currently involved in the production and distribution of BioDiesel in Canada and the U.S. Topia Energy has three integrated business operations. Topia is in the process of building a 20 million litre a year production facility in Sudbury, ON and is involved in setting smaller production plants across the country.

[BIOTE Canada](#)

The national industry-funded association representing the broad spectrum of biotech constituents including emerging, established and related service companies in the health, agricultural, and industrial sectors.

[IOGEN Corporation](#)

Iogen is a world leader in technology to produce cellulosic ethanol, a fully renewable, advanced biofuel that can be used in today's cars.

[Canadian Biofuel](#)

Committed to research, development, and production of a sustainable supply of biomass fuel pellets through application of contemporary densification technology. By uncovering new sources of energy and reusing residual materials as part of the energy cycle, we benefit a Working Ecosystem.

[Alternative Fuels Corporation](#)

Mission: To create cleaner alternatives to the world's rapidly dwindling oil supply and to help the world transition from oil to cleaner transportation fuels
Vision: A world where people can choose to use cleaner greener transportation fuels when they fill their vehicles.

[Council for Biotechnology Information](#)

Communicates science-based information about the benefits and safety of agricultural biotechnology and its contributions to a sustainable food chain. Its members are the leading agricultural biotechnology companies.

[Bioproducts at Guelph](#)

The Department of Plant Agriculture at the University of Guelph is proud to be a leader in bioproducts research and development. This new field will help create an environmentally sustainable future without a large dependency on non-renewable sources such as fossil fuels.

[Biofuels Quality Registry](#)

The objective of the Biofuels Quality Registry is to support the Biodiesel Initiative, announced under the Climate Change Plan for Canada, in establishing a Centre of Excellence to promote increased biofuel use.

[US Dept Energy Biomass Program](#)

The Office of Energy Efficiency and Renewable Energy's Biomass Program works with industry, academia, and our national laboratory partners on a balanced portfolio of research in biomass feedstocks and conversion technologies.

[Biofuels Today](#)

Ethanol Expertise is a dedicated and experienced team of chemical engineers offering consulting services and process assessment/auditing in the ethanol and biodiesel production field.

[Canadian Renewable Fuels Association](#)

A non-profit organization with a mission to promote the use of renewable fuels for transportation through consumer awareness and government liaison activities.

[Millennium Biodiesel](#)

A BC based company committed to providing premium quality biodiesel blends with an unrivaled level of service to our customers in Western Canada. Mission is to become Western Canada's leading distributor of biodiesel blends for use in the Marine and Off-Road sectors.

[Ontario Bioproducts](#)

This website is designed to provide the best available information on bioproduct companies, researchers and potential investors in Ontario.

[Biodiesel Producers](#)

Using the world's leading technology, we convert tallow and waste cooking oil into quality diesel fuel that is significantly lower in toxic and greenhouse gas emissions than normal diesel.

[Greenfield Ethanol Inc.](#)

Canada's largest ethanol company - producing 450 million litres in fuel ethanol annually. Sold at 1,300 gas stations, the company's ethanol reduces fill-up costs and cuts harmful greenhouse gas emissions.

[Ethanol Producer Magazine](#)

The world of ethanol at your fingertips.

[NCERC—National Corn-to-Ethanol Research Centre](#)

Mission: To facilitate the commercialization of new technologies for producing fuel ethanol more effectively.

[RFA—Renewable Fuels Association](#)

As the national trade association for the U.S. ethanol industry, the RFA promotes policies, regulations and research and development initiatives that will lead to the increased production and use of fuel ethanol.

[IReF-Integration of Renewable Energy on Farms](#)

Features technical information and online tools to help farmers integrate renewable energy sources onto individual farms and improve farm sustainability. It also acts as a tool to help farmers assess their renewable energy options and determine the exact return on their investment.

[Suncor Biofuels](#)

Since 2006, has been making a significant impact in Canada's emerging biofuels industry. Suncor is using revenues from oil sands development to invest in biofuels, particularly ethanol produced from corn. Ethanol is a cleaner burning, renewable resource.

[Harvesting Clean Energy](#)

A program of Climate Solutions, a nonprofit organization based in Olympia, Washington. The program's goal is to help accelerate rural economic development in the Northwest through clean energy development.

[Biofuel Blog War](#)

A site dedicated to providing the most informative, current and useful news and articles related to Biofuel, BioDiesel and related alternative energy resources.

[Biofuels Digest](#)

The Digest covers producer news, research, policy, policymakers, conferences, fleets and financial news. It is home to the Biofuels Digest Index™, a benchmark basket of biofuels stocks, and the "50 Hottest Companies in Bioenergy" list.

[Top Crop Manager](#)

"Canada's magazine of crop production and technology" — is specifically designed to help top crop producers whose goal is long-term sustainability.

[Biomass for Energy Initiatives Network](#)

To encourage bioenergy initiatives in Hastings & Prince Edward Counties through discussion and accessibility to information and resources.

[Biomass Connections](#)

An Energy Crops site for Farmers and Ag Professionals

[REAP-Canada Resource Efficient Agricultural Production](#)

A Research, Consulting and International Development Organization creating ecological solutions for sustainable food, fibre and energy.

[Oilalgae.ca](#)

[Oilalgae.ca](#)

BioFuel produced from Algae. Often called Algae Oil, Algae Fuel or Oilgae is a 3rd generation bio-fule produced from Algae. Vegetable oil, biogasoline, bio-methanol, biodiesel, bioethanol, biobutanol and other biofuels can be made from Algae.

[BIOFUEL BLOG WAR](#)

[BiofuelsDigest](#) The world's most widely read biofuels daily
